Why Learning about the Constitution, American History, our Form of Government is so Important: More of our youth do not know their history or understand the precious form of government that we have. The following quote lets us know how important such learning is. It is from George Washington, the Father of our Nation: He said: *"A primary object...should be the education of our youth in the science of government. In a Republic, what species of knowledge can be equally important? And what duty more pressing...than communicating it to those who are to be the future guardians of the liberties of the country."*
